CAREER OBJECTIVE

Adaptable full stack developer skilled in JavaScript, eager to build scalable, user-focused applications. Seeking to contribute problem-solving skills, quick learning, and dedication to innovative teams globally. Passionate about creating impact.

WORK EXPERIENCE

Virtual Technology Intern

Feb 2026

Deloitte, Virtual

Completed Deloitte Technology Job Simulation (Forage), working on real-world coding and development tasks aligned with consulting scenarios. Applied problem-solving and software development skills to design enterprise-level technology solutions in a virtual client environment.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2024 - 2029

SRM Institute Of Science And Technology, Kattankulathur Main Campus

Senior Secondary (XII), Andhra Pradesh State Board

2023

Science

Ascent Classes

Percentage: 80.30%

Secondary (X), Andhra Pradesh State Board

2021

Chalapathi Public School

Percentage: 89.00%

TRAININGS / CERTIFICATIONS

Full Stack Development

Oct 2025 - Present

Internshala, Virtual

- Fundamentals of Full Stack Development
- Web Page Designing (HTML and CSS)
- Git and GitHub: Version Control
- Websites Development (JavaScript)
- Data Structures and Algorithms (DSA) in JavaScript
- Web Applications Building (React)
- Node.js, Express.js and MongoDB for Web Development

PORTFOLIO

[Portfolio link ↗](#)

PROJECTS

[ShoppyGlobe: An E-commerce Application ↗](#)

Feb 2026 - Mar 2026

- Implemented ShoppyGlobe, supporting e-commerce transactions with features for product browsing and cart management.
- Built a responsive interface using React and React Router for smooth navigation, promoting an engaging user experience.
- Deployed API integrations for real-time product updates and utilized Redux for effective state management, enhancing app performance.

[Advanced Problem-Solving in Recursion, Linked Lists, Stacks, Queues, and Trees ↗](#)

Jan 2026 - Feb 2026

- Strengthened problem-solving skills by solving complex problems involving recursion, linked lists, stacks, queues, and trees using JavaScript.
- Gained expertise in designing, implementing, and optimizing data structures for real-world technical applications and coding interviews.

[Weather Forecast Application ↗](#)

Dec 2025

- Designed and developed a weather prediction application featuring user-friendly navigation with real-time and forecasted weather for chosen locations.
- Integrated asynchronous API calls for retrieving weather information, updating the DOM dynamically for live conditions.
- The application was designed responsively using JavaScript to support diverse devices, enhancing overall user interactivity and data management.

[Personal Portfolio Website ↗](#)

Oct 2025 - Nov 2025

- Created a personal portfolio website using HTML and CSS to display my skills and projects to potential clients and employers.
- Designed a responsive interface that works seamlessly across all devices and implemented intuitive navigation to boost user interaction and engagement.

SKILLS

- | | | |
|-------------------|-------------------|--------------|
| • HTML 5 | • GitHub | • CSS3 |
| • Tailwind CSS | • JavaScript | • REST API |
| • Data Structures | • React | • MongoDB |
| • Express.js | • Node.js | • Leadership |
| • Problem Solving | • Time Management | • Python |
| • Redux | | |

ADDITIONAL DETAILS

- Hackathon Participant and Student Volunteer. Participated in two hackathons, collaborating with teams to build innovative solutions under deadlines, showcasing problem-solving, teamwork, and adaptability.

[Developed APIs with Node.js and Express.js for Shoppyglobe ↗](#)

Mar 2026

- Developed APIs for ShoppyGlobe using Node.js and Express.js, handling data storage and user authentication.
- Leveraged MongoDB for efficient storage, ensuring frontend-backend integration.
- Established RESTful endpoints for products, registration, and authentication, using JWT for secure tokens.

[Mastering DSA: Arrays, Searching & Sorting ↗](#)

Jan 2026

- Developed strong proficiency in arrays and searching/sorting algorithms to create efficient and optimized solutions.
- Improved logical thinking and computational skills through consistent hands-on coding practice and problem-solving exercises.

[Student-Registration-System ↗](#)

Dec 2025

- Developed a responsive Student Registration System using HTML, CSS, and JavaScript with features to add, view, edit, delete, and search student records through a user-friendly interface.
- Implemented form validation, DOM manipulation, LocalStorage data persistence, and auto-scrolling for accurate entry, dynamic updates, and smooth multi-page usability across devices.

[Donation Tracking System ↗](#)

Aug 2025 - Oct 2025

- Developed a responsive donor management web app using HTML, CSS, JavaScript, and Tailwind CSS with CRUD functionality, dynamic UI updates, LocalStorage persistence, and form validation.
- Integrated Firebase Authentication (Email/Password & Google Sign-In) and built an analytics dashboard to visualize donation trends with a clean, user-friendly design.
